

The Compass Group

Overview

Compass Group Management LLC manages the day to day business and operations of Compass Diversified Holdings (NYSE: CODI), a publicly traded holding company. CODI seeks to generate superior risk adjusted returns for its shareholders through the acquisition and control of a diverse set of North American middle market businesses. We identify, evaluate, negotiate, and where appropriate, consummate acquisition opportunities on behalf of CODI.

As a result of our management of CODI, we have access to substantial financial resources committed to the acquisition and management of middle market businesses. Upon completion of an acquisition, we immediately begin to work with the acquired company's management team to identify the most critical and time sensitive needs and opportunities and to address them aggressively.

Unlike private equity firms who seek third-party acquisition financing on a transaction-by-transaction basis, our relationship with CODI allows for the efficient and quick consummation of transactions on its behalf, without financing contingencies. In addition, companies acquired by CODI have ongoing access to substantial growth capital. Finally, CODI's ownership perspective as a holding company is not impacted by artificial timing criteria such as fund life. Rather, we continuously work with management of CODI's subsidiary companies to evaluate strategic alternatives and assess the appropriate individual course of action for each of those companies, without regard to external and unrelated factors.

Investment Criteria

We will consider acquiring controlling interests in companies with the following characteristics:

- Leading niche industrial or branded consumer companies headquartered in North America;
- Preferred transaction size of \$75mm to \$500mm;
- Positive and stable EBITDA of at least \$10mm per annum;
- Highly defensible positions in their markets and with their customers (i.e. has a reason to exist and their absence from the market place would disrupt the category);
- Operating in industries with favorable long term macroeconomic trends;
- Strong management teams, either currently in place or previously identified.
